

7.1.2 The Institution has facilities and initiatives for

1. Alternate sources of energy and energy conservation measures

a. Solar Energy Generation

JMJ education society, a parent body of Acharya & BM Reddy College of Pharmacy, takes effective steps towards energy conservation. Harnessing the solar energy by installing solar PV power plant on rooftop helps supplementing and powering the entire institute with a solar capacity of 480 KWP. In addition, the solar energy generated is outsourced to BESCOM, Karnataka at INR 2.9/KhW. the energy of the country, by implementing. The details of the solar PV modules and geo-tagged images are provided below.

b. LED lamps to minimize power consumption

ABMRCP also has taken initiatives to replace the traditional lightning systems into LED lamps to minimize the power consumption in the institute.

LED Lamps Installed in the College

2. Management of the various types of degradable and nondegradable waste

Degradable and nondegradable waste management is done by performing tasks like electronic waste, Dry waste, and Liquid waste management by STP plant to turn in to a better environmentally friendly Institute.

a. E-waste Management and Recycling at the Institute

E-waste management and recycling in ABMRCP is done in collaboration with Karnataka State Pollution control board and Premier Comprint. The supporting documentation is attached below.

Dear Sir/Madam,

Sub: - Company Profile and Introduction letter for handling Bio-Medical waste in Scientific Manner.

With reference to the abovementioned subject, we would like to introduce ourselves as pioneers in the field of Bio-Medical Waste Management. We are glad to inform you that we have already put up a facility to manage Bio-Medical Waste in a scientific manner at KIADB Industrial Area in Plot No.56, Kudumalakunte New KIADB Industrial Area, Gowribidanur Taluk-561208, Chikkaballapura-(District) & Head Office at Roopa Complex, No. 66&67, Ganesha Layout, MSPalya, Vidyananyapura Post, Bengaluru-560097.

Prajwal BMW Management Systems (A unit of VV Incin Solutions Private Limited) is a company registered under the companies Act with the primary objective being Bio-Medical Waste Management. Prajwal BMWMS has set up an integrated Bio-Medical Waste Management facility, technically reliable. The intended facility shall operate on a "user-pay" principle. Each user shall contribute Prajwal BMWMS in proportion to the quantity of waste generated by them that is processed at the facility.

Prajwal Entrepreneur has highly trained and experienced professionals in the management and handling the Bio-Medical Waste. We have the Experience in the service of Bio-Medical Waste Management in the districts of Bangalore Urban, Bangalore rural, Chikkaballapura, Chitradurga, Hassan, Chikmangalore of Karnataka state from last Ten years.

d. Dry waste management system

Dry waste from ABMRCP is maintained and handled through a standard operating procedure. Related document and photos are attached below.

STANDARD OPERATING PROCEDURE

SOP No: 1 Date of issue: 12/12/2016

DRY WASTE SORTING

Objective:

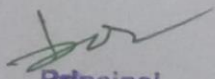

To ensure that the waste produced from the cafeteria and pantry have to be sorted into respective categories as specified in the guidelines.

General policy:

To ensure that the waste produced has to be sorted at the source (plastic, paper, food waste, and carton) and to reduce the waste generated which complies with go green initiatives.

Procedures:

1. Waste collection System
 - a. Waste from the floors will be deposited at the OWC sorting room.
 - b. PPE should be worn at all times by field staff and housekeeping staff.
 - c. Log book shall be maintained with the following details:
 - Source of waste (Floor No / Client Name)
 - Collection time
 - Total weight at the time of hand over.
 - d. Later waste to be placed near the respective sorting area of the following categories:
 - Plastic waste
 - Paper waste
 - Sanitary waste
 - Metal waste
 - Glass waste
2. Dry waste sorting
 - a. First in First out (FIFO) model to be followed.
 - b. One bag is considered at the time of sorting.
 - c. Mixed dry waste is opened and spread on the sorting table.
 - d. Mixed waste is sorted into different categories.
 - e. Unit supervisor should closely supervisor these categories.
 - f. Samples of different waste to be displayed near the sorting area.
 - g. After completion of each bag, sorted dry waste is weighed individually w.r.t categories.

e. Sanitary napkin disposal machine in women's rest rooms

Sanitary waste is maintained and handled through a Sanitary Napkin disposal/ incineration machine installed in all the women rest rooms in ABMRCP. Related photos are attached below.

Sanitary Napkin Incinerator installation at women's rest rooms

3. Water Conservation

Rainwater harvesting and recycling

The campus has its own mechanism for rainwater harvesting which includes building of four-acre artificial lake. Rainwater harvesting is at its priority, and the rainwater is collected into artificial lake through the well-planned drainage system. Rain water harvesting help ground water recharge and the collected water is used for farming and gardening in the campus.

Purchase Order of Water Level Sensor

4. Green campus initiatives

Institute has undertaken initiative to establish an eco-friendly campus and strives in keeping the Eco –friendly atmosphere in the campus. Planting trees, garden landscaping throughout the campus, plastic ban, restriction for automobile entry, allocated parking for two-wheeler and four-wheeler are the few measures in this regard. Pedestrian friendly pathways are designed throughout the campus for the safety of staff and students. To understand the negative impact on the environment, the institute has taken steps like conducting Green / environment / energy Audit every year. Photos of the same are provided below.

Rich vegetation and gardening in the institute

Trees and garden landscaping in the campus
